

MASTER ASSOCIATION MINIMUM REQUIREMENTS TO ADD HEADS IN EXISTING ZONES

1. Neighborhood irrigation specialist will complete the irrigation modification form and have approved by the Master Association prior to beginning any work.
2. The neighborhood irrigation specialist should know what the total flow into the zone is before adding any additional sprinkler heads. This information is provided by the Master Association who is responsible for contacting the association's water manager.
3. Coordinate with Master Association an inspection of work performed prior to completion of the job by the association's representative. The master association representation will verify proper pipe sizes are installed at time of modification.
4. After any additions or modifications are completed, the Master Association reconfirms the total flow. (This representative will contact the water manager to test the system and obtain the flow rate.)
